**DETAILED ACTION**

***Information Disclosure Statement***

1. The information disclosure statement (IDS) submitted on 3/29/2007 was filed after the mailing date of the Notice of Allowance on 11/20/2006. The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the information disclosure statement is being considered by the examiner.

***Examiner's Amendment***

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.
3. Authorization for this examiner's amendment was given in a telephone interview with Att. Kordich on November 15, 2006.
4. The application has been amended as follows:
5. In claim 1, line 4, after "inverters", insert - that include a first and second NFET and a first and second PFET".
6. Cancel claims 2-3.
7. In claim 4,
  - a. line 1, before "each" insert- for--;and after "inverters", insert--, --;
  - b. line 2, replace "comprise a" with - the --; and before "n", replace "a" with - the --.
8. Cancel claim 6.

***Reasons for Allowance***

9. The following is an examiner's statement of reasons for allowance: The prior art of record fails to disclose an apparatus comprising elements being configured as recited in the claims. Specifically, none of the prior art or combinations thereof teaches or fairly suggests the following features in combination with the other limitations of the claims:

10. None of the prior art disclosed or suggested to show the particular structure and/or the particular operation recited in these claims namely: the details of "predriver", such as: "the first NFET is larger than the second PFET, creating unequal delays...rising to logic one" and "the second NFET is larger than the first PFET, creating unequal delays between the output of the second inverter ... rising to logic one" in combination with "a driver" as recited in claim 1; "the NFETs of the cross-coupled inverters are larger than the PFETs of the cross coupled inverters, said NFETs and PFETs being sized with respect to each other ... rises to logic one in response to a transition in the input signal" in combination with "an input inverter", "two cross-coupled inverters", "first and second output buffers" and "first and second tristate devices" as recited in claim 10; "cross-coupled inverter means ... includes first and second outputs, the first output has a first delay charging relative to the second output discharging, the second output has a second delay charging relative to the first output discharging, and said first and second delays are created by the unequal transistor sizes of the cross-coupled inverters" in combination with "inverter means", "first and second output buffer means" and "first and second tristate means" as recited in claim 23; "sizing the NFETs and PFETs of the cross-coupled inverters such that each of the NFETs are larger than each

of the PFETs of the cross-coupled inverters sothat a first time constant to charge a first output of the cross-coupled inverters is greater than a second time constant to discharge a second output ... so that the first output discharges before the second output charges" in combination with all the method steps as recited in claim 26.

11. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
